# THEME PARKS

# THEME PARKS

*“The key to create a good attraction is the perfectly balanced combination of creativity and technology”*

Scientific university studies show that themed attractions attract a significantly larger amount of visitors to a park, compared to non-themed attractions. Our job is to create custom-made themed concepts for small and major theme parks, from dark rides to roller coasters, from themed attractions to walkthroughs and interactive spaces and experiences.

Besides masterplanning and creating new attractions, we have developed a special method of upgrading old rides: **“Pimp my Ride”**. Usually an obsolete ride in a park means a large investment to remove the ride and build a new one. However, an existing ride can be the fundament of a new experience which will immerse your guests in a new story, a visual environment filled with sound and special effects.

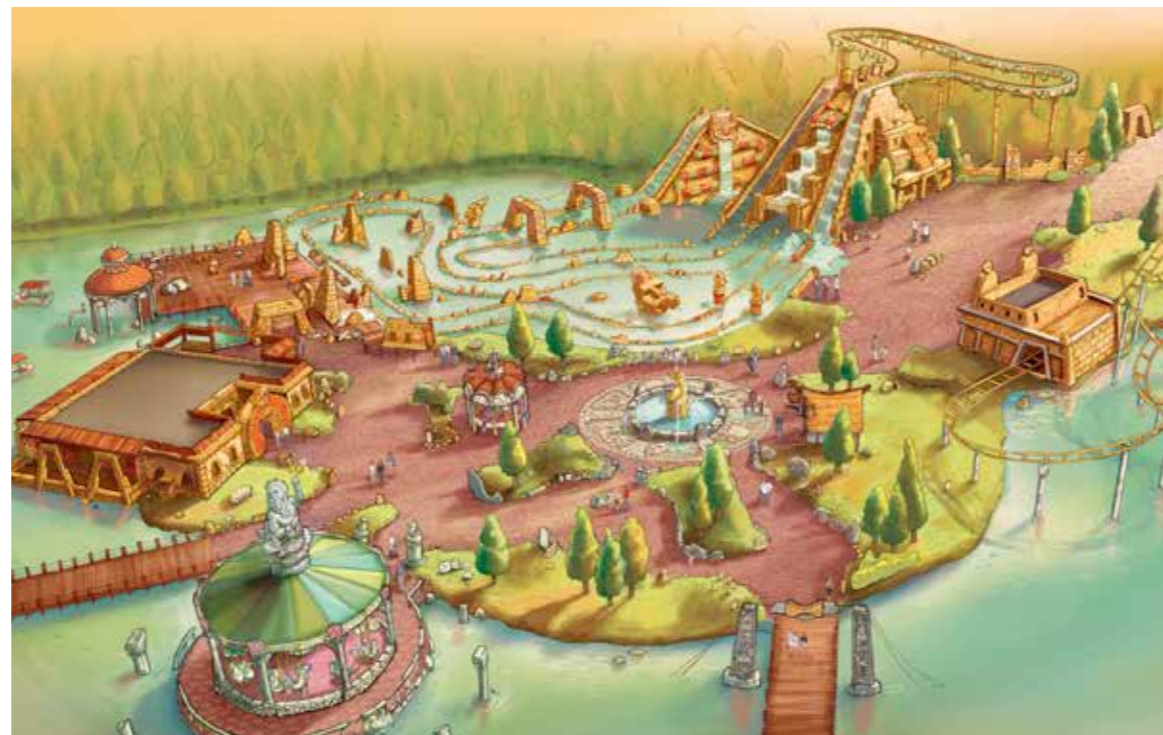

# ADVENTURE WORLD WARSAW

Adventure World Warsaw will be a brand new park in Poland. In a magical mythological world are five unique lands all based on myths and legends from around the world.

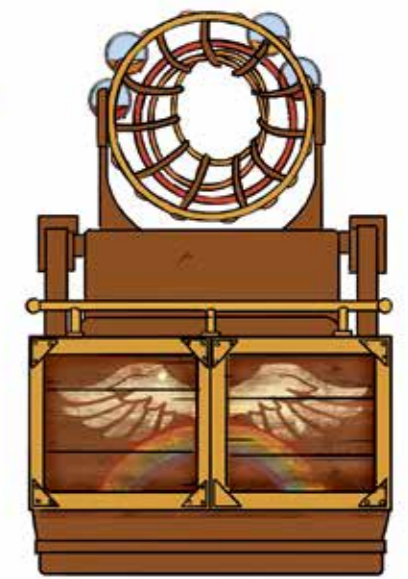

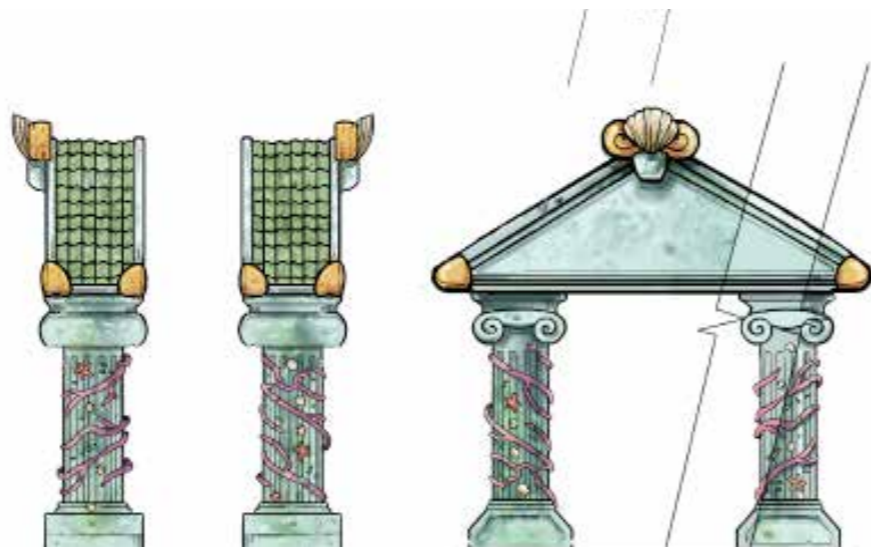

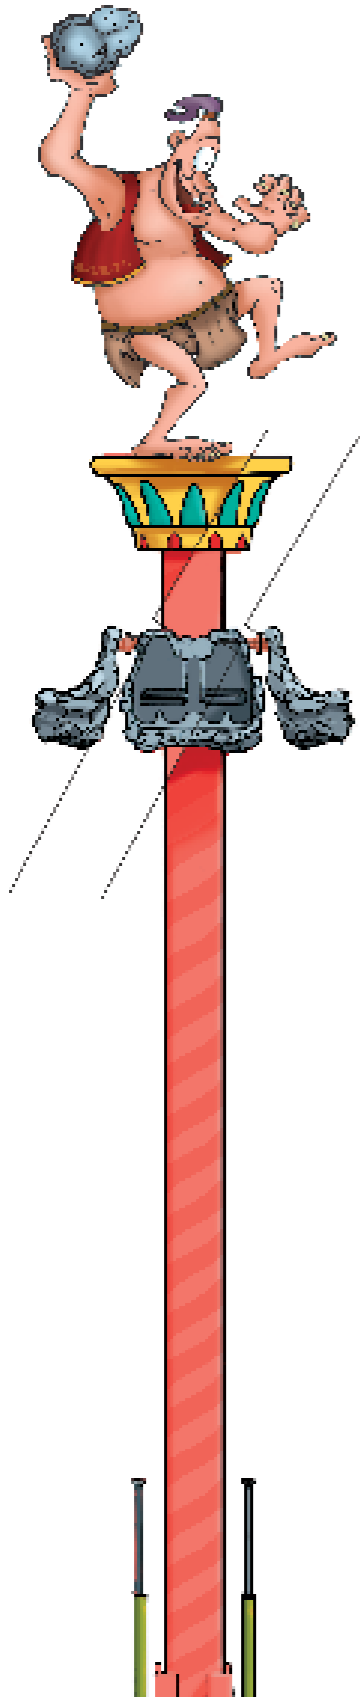

Jora Vision developed the masterplan and the total design of the park. We created a story where all myths and legends come alive in great ride experiences, show venues, beautiful restaurants and merchandise locations.

# FUTUROSCOPE, ARTHUR L'AVENTURE 4D

The universe of Arthur and the Minimoys was created by the famous French director Luc Besson. Jora Vision transformed the scenery of the movies into 3 dimensional décor and a highly themed queue line for the attraction named Arthur, l'Aventure 4D. The project was awarded with the prize for best new attraction in 2012 by the Themed Entertainment Association. Besides Arthur, l'Aventure 4D, Jora Vision worked on "Le Petit Prince", Les Yeux Grands Fermés, Moonlight and others.
